

**SUPPORT BROCKTON CLEAN ENERGY!!!**  
**SEPTEMBER 28<sup>TH</sup>, 7 PM**

Are you fed up with the mismanagement, stagnation and business as usual at City Hall?  
Now is your opportunity to make your voice heard!

Mismanagement of finances, record-keeping and city services has left residents with \$100,000 water bills and **taxpayers footing the bill for \$4 million in water it doesn't use from Aquaria desalination.** The City of Brockton is refusing to sell this surplus water to Brockton Clean Energy.

Brockton Politicians have also refused to sell Brockton Clean Energy water from Brockton's Water Treatment facility, **a deal that would open water treatment capacity allowing Brockton to raise \$6 million from neighboring towns,** and help solve the financial shortfall at the water department.

While the City's budget deficit reaches into the tens of millions of dollars, city officials continue to stall economic development plans across the city, including the Brockton Clean Energy project, at a time when Brockton continues to lead the state in foreclosures and low residential property values.

The same city that brought you \$100,000 water bills has also spent the past three years fighting a project that has been proven to bring hundreds of **millions of dollars of economic stimulus, new tax revenues, and hundreds of jobs to Brockton.** In fact, they have spent \$100,000 of your money fighting it! Brockton politicians have steered the city in the wrong direction long enough.
